### Easy entry system

Both the specially designed construction of the instep and the innovative Easy Entry system make boots simple to get on/off quickly and easily.

### 4DRY

4DRY liners provide breathability, drainage, ventilation and water resistance, keeping the foot warm, dry and comfortable.

### Custom Fit

Alpina liners boast a number of key features that ensure a perfect balance between performance and comfort. Thermoformable foam ensures optimal fit in the sensitive ankle area, while the specially-designed foreliner adapts to the many variations in foot profiles.

Alpina's unique fully-integrated InTemp heating system keeps your feet comfortably warm at all times, but never overheated.

By swapping the specially designed Volume Control Plate between the left and the right boots you can adjust the boot volume for optimum fit.

## Women's specific cuff

Boots are designed and cut a little lower to better accommodate the specific features of women's feet and lower calves.

## VCR

VOLUME CONTROL  
REGULATOR

Width and height adjustable control plate for fast and easy adjustment in the calf area.

## RMA

RATCHET MACRO ADJUSTMENT  
Functional, light and strong.  
The user-friendly design is easy to operate and provides extra support without impeding flex.

## Fur lining

Special synthetic fur lining is soft, pliant, warm and comfortable – at play and rest.

# Created for women

# designed to deliver

Drawing on Alpina's years of footwear expertise the Ruby series is designed to provide better feel, flexibility and comfort specifically for women, especially in the calf area.

# RUBY 65 HEAT

# Strength, Versatility & Comfort

## Height /Volume Adjustable Spoiler

A special element at the rear of the boot enables modification of the height / volume of the cuff.

## Canting

The best skiers demand the perfect stance. Adjustable canting allows for the lateral alignment of the boot to be adapted to individual preferences, which enables the skier to develop perfect technique.

## SKI /HIKE

Switching between ski- and walk-modes has never been simpler or easier – just insert the end of a ski pole, switch, and go.

## Xframe

A rigid, lightweight structural frame connects the four main stress points and is reinforced on the most demanding axes, ensuring maximum strength and rigidity while reducing weight.

## Smart Control

Ready to use with the simple push of a button, the system runs at full-power for initial warm-up, then automatically returns to normal power, so feet are optimally warmed but never overheated.

## Charging

The boot's charging input is small, discrete, easily accessed and weather-proofed. Smart and simple – no need to disassemble the boot to charge.

## Battery

Batteries are fully integrated inside the boot, and also easily changeable.

# NEW

# DUO Junior

Our new Junior boots feature improved ergonomic design where we have adapted the shell to follow the counters of the foot. This gives us a more accurate and improved fit out of the box. This also enabled us to make it as light as possible, without sacrificing the performance.
